PROFESSIONAL PROFILE

Strategic GTM & Revenue Lead with over 15 years of experience driving large-scale digital and AI adoption across the Singapore Public Sector. Proven track record of owning and exceeding \$1M+ ARR targets by architecting complex deal strategies—from demand creation and deep agency research to high-stakes closure. Specialized in unseating legacy incumbents by architecting "AI-First" solutions that prioritize government IP ownership and technical agility, enabling agencies to integrate new model capabilities at the speed of research.

EXPERIENCE

Workato Inc, Singapore — Enterprise Account Lead, SG Public Sector

September 2024 - PRESENT

Revenue & Consumption Ownership: Directly own and manage a \$1M ARR portfolio, tracking usage patterns and architecting new use cases to ensure continuous platform adoption and consumption growth.

Strategic Disruption: Lead "AI-First" modernizations for major entities like Synapse, pitching custom-built architectures over generic SaaS to ensure long-term feature sovereignty and agility.

Policy-Driven Demand Creation: Pivot agency strategies to align with national AI initiatives, driving the deployment of AI assistants to optimize officer-level productivity across the Public Service Division (PSD).

Institutional "AI-First" Advisor: Acted as a trusted advisor to NTU leadership, preparing the institution for a top-to-bottom transformation into an AI-First University.

VEO SAS, Singapore — Regional Business Development & Transformation Lead

2019 - 2024

Bespoke AI Architecting: Spearheaded \$1M+ per key account revenue targets by delivering tailor-made solutions for MAS and TTS, that gave government and healthcare agencies full control over their code-base.

Value-Driven Governance: Convinced stakeholders to move away from trusted legacy providers by demonstrating the ROI of IP ownership, allowing agencies to adapt quickly to new AI features without vendor lock-in.

NCS Group, Singapore — Global Business Development / Land Transport Lead

2016 - 2018

Public Sector Modernization: Led digital transformation for "nation-building" projects, including LTA (ERP 2.0) and HK Public Sector, bridging legacy infrastructure with Smart City capabilities.

Capgemini / Logica / Comverse, Various Locations — Senior Management & Consulting

2000 - 2015

Senior Leadership (Comverse): Promoted to Senior Management for consistently adding tangible value to customer processes and proposals through consultative engagement.

Global Program Orchestration (Amex): Directed a multi-workstream program for **American Express (Japan)** to transition corporate processes to a mobile-first environment.

Regional Market Insights (Nokia): Managed complex delivery across diverse Southeast Asian markets, navigating varied regulatory and digital maturity landscapes.

EDUCATION

Nanyang Technological University (NTU), Singapore — FlexiMasters in AI and AI Ethics

2022 - 2025

Focus: Responsible AI deployment, Deep Learning, and LLM frameworks within ethical boundaries for Public Sector adoption.

National University of Singapore, Singapore — Bachelors of Science (Computer Science) and Master of Technology (Software Engineering)

SKILLS and PROJECTS

Core Competencies: Consumption Revenue Forecasting, Complex Deal Strategy (Demand Creation), C-Suite Stakeholder Management, and Public Sector Policy Intelligence.

Key Project - NTU: Lead advisor for AI-First university operations, modernizing academic processes through new automation and AI frameworks.

Technical Knowledge: Deep familiarity with Agentic transformation, OpenAI model integration, and the global AI/ML landscape.
