

Essential Job Functions:

- Own and manage strategic client accounts, acting as the primary point of contact and trusted advisor to drive long-term partnerships and account growth
- Develop and execute account plans focused on revenue growth, profitability, and expansion within assigned accounts
- Build strong relationships with key stakeholders across client organisations, particularly within public sector agencies
- Drive upsell and cross-sell opportunities by positioning end-to-end IT services solutions (applications, cloud, analytics, cybersecurity, managed services)
- Partner closely with sales, solutioning, and delivery teams to shape proposals and win business
- Oversee end-to-end delivery in collaboration with delivery teams to ensure projects are delivered on time, within scope, and meet contractual commitments
- Monitor account financials, including revenue, margins, and forecasting; ensure projects meet profitability targets
- Track project performance and ensure timely execution to meet client and internal KPIs
- Maintain high levels of customer satisfaction (CSAT/NPS) through consistent engagement and successful delivery outcomes
- Prepare and present account reviews, reports, and growth plans to internal and client stakeholders
- Stay up to date on public sector trends, procurement landscape, and technology developments to refine account strategies
- Coach and support junior team members where required

Basic Qualifications:

- Minimum 4–5 years of experience in IT services or system integration sales
- Proven experience managing and growing accounts within the **Singapore public sector**
- Strong network and relationships within government agencies preferred
- Experience selling **end-to-end IT solutions** such as application development, managed services, cloud, analytics, cybersecurity, and infrastructure services
- Strong account farming experience with a track record of growing existing accounts
- Experience in account planning, pipeline management, and developing growth strategies
- Solid understanding of financial management, including forecasting, revenue tracking, and margin management
- Demonstrated track record of meeting or exceeding sales and revenue targets

- Strong stakeholder management, communication, and influencing skills
- Bachelor's degree or equivalent experience
- Continuous learner with a strong understanding of IT services and market trends

Other Qualifications:

- Experience from leading IT services or system integrator companies is preferred
- Professional certifications, such as Certified Account Executive (CAE) or Certified Strategic Account Manager (CSAM) are an advantage
- An advanced degree is a plus
