

Cover Letter - Account Executive, Public Sector

May 28, 2026

Hiring Team (Account Executive - Public Sector),
Databricks
📍 Singapore

Dear Databricks Hiring Team,

I am writing to express my interest in the Account Executive (Public Sector) position, as advertised on your careers page. With over 15 years of consistent success in driving **Data, AI, and Cloud** adoption within the Public Sector, FSI, and Telecommunications industries, I possess the strategic expertise and "hunter" mindset necessary to significantly contribute to Databricks' market expansion and growth across Asia Pacific.

My profile, detailed in the attached CV, demonstrates a proven ability to translate complex **Big Data and AI architectures** into compelling C-Suite business value (TCO/ROI). My recent academic pursuit, a FlexiMasters in Artificial Intelligence and AI Ethics from NTU, ensures my technical fluency is current, positioning me as a credible consultative partner for clients embarking on their journey to establish **Agentic AI and Data Intelligence** as a core enterprise asset.

Key aspects of my experience that align with this role:

- **Hunter Mentality & Market Entry:** As highlighted in my Core Competencies, I am an expert in **New Market Entry & Expansion** and securing "First-in-Account" wins. At DigitalRoute AB, I successfully opened new markets in Greater China and ANZ. My experience at Workato involved building a 3X pipeline from zero in the Singapore Public Sector.
- **Vertical Expertise:** I have deep, specialized experience in the Public Sector (GovTech/GCC), FSI, and Telecommunications, which are primary focus areas for

Databricks. My track record includes leading digital transformation bids for Public Sector agencies (NCS Group) and modernizing legacy architectures for major Telcos (DigitalRoute, Comverse, Capgemini).

- **Strategic & Consultative Sales:** I employ a solution-centric approach, utilizing methodologies like **MEDDPICC** (as noted in my professional summary) to manage end-to-end sales for bespoke software and SaaS ecosystems. This ensures a focus on repeatable business outcomes, bridging the gap between legacy data silos and modern AI-ready environments.
- **Legacy Modernization & Disruption:** I excel at displacing legacy on-premise solutions with modern Cloud/SaaS Data Intelligence platforms, a critical skill for a "Hunter" targeting modernization opportunities.

I am eager to discuss how my track record of navigating complex "pilot-to-production" cycles and my specialization in **Data, AI, and Cloud** transformation can be leveraged to secure strategic wins and accelerate Databricks' leadership in the region.

Thank you for your time and consideration. I look forward to the opportunity to elaborate on my experience.

Sincerely,

LEE Gee-Sin
